Everyday thousands of new babies are born and more people are diagnosed with diseases.

THEY WANT TO GET HEALTHY!

WEIGHT LOSS.

According to Bloomberg Business "Americans spend \$40 billion a year on weight-loss programs and products."

ENERGY *AND* LONGEVITY

Energy boosting products have become part of the normal every day routine.

The demand for these products has skyrocketed as well.

A 12 billion dollar industry, the need for these supplements are in high demand as individuals strive to work longer hours while sacrificing spending more time with family and friends.

SKIN CARE *AND* ANTI-AGING

The US skincare industry is expected to experience moderate growth and reach an estimated \$12.2 billion by 2018.

The major driver of skincare industry is the rising concern and demand for natural and organic skincare products. Growing concern for health and safety, consumer awareness about synthetic chemicals, and rising green consciousness drove the demand for organic and natural skin care products.

Another key driver of skincare industry is increased demand of anti-aging products. This market is benefited by high disposable income of baby boomers group.*
